

The Web-Dev Battle

05th July 2021 - 23rd August 2021

Project Problem Statement

Build a simple expense manager website that can be used by all for tracking their expenses accordingly. The website can be used to plan out the expenses for a group of people. Further, the user can also add bills under the given budget and track her expenses accordingly. This website would be built using HTML, CSS, Bootstrap, MySQL, and PHP.

Please [click here](#) to view the detailed problem statement.

What you're supposed to do:

- The contestants are supposed to register for the Web Development training on Internshala Trainings.
- From the start date of the training (05th July 2021), you will be able to access the training content.
- Start learning from the first module. To unlock the next module, you would have to attempt the module test of your current module. Please make sure that you complete your assignment before you attempt your module test. It would help you get a better score in your test.
- Complete all the modules in the training. Please ensure that you submit your solution before the deadline.
- You will be able to submit your solution after completing the 4th module only

Restrictions:

- Make sure you are not using any template.
- Make sure your score in the final test is not less than 33%.
- Take your final test before the end date and submit your project before the deadline.
- Make sure that the submitted project is a work of your own and not copied from any external sources.
- Contestants must be beginners and should not have any prior knowledge of the subject. If found otherwise, you will be disqualified.

Note: In case you need more time to complete the training beyond 6 weeks, you can request an extension as per regular extension. However, you will not be eligible to participate in the contest anymore.

Submission

Create a readme.txt file that states the steps required to run the project. Place all the created files and resources in a single folder and create its zip file(Please ensure this zipped folder also includes your database file(.sql)). Now, upload this zip file to the progress tracker. Late submissions will not be considered for evaluation.

Note: Resubmissions are not allowed

Evaluation

Your project will be evaluated on three grounds:

1. **User Interface** : Make sure all the UI components are present which are there in the project and aligned correctly.
2. **Functionality**: Make sure all the components added are functional and the database is added properly at all the required places.
3. **Coding Conventions**: Make sure that the code is properly formatted and appropriate comments are present, thus making the code modular and readable.

All the pages are evaluated on the basis of the above three tasks.

****Important Notice:**

1. **You need to score a minimum of 75% in the final test and a minimum of 50% in the project in order to be eligible for rewards.**
2. Final winners will be announced based on the project, and the participants may be interviewed before the announcement.
3. The decision on the winners and runners-up made by Internshala will be final and binding.
4. The projects of the top 100 performers in the Final Test will be evaluated.

Important Dates

- **Last date** to give the **final test** - **16th August 2021**
- **Training End Date** - **23rd August 2021**
- **Last date** to **submit the project** - **23rd August 2021**
- **Results** to be announced - **15th December 2021**

Queries

Please reach out to trainings@internshala.com for any queries regarding the contest. For any queries regarding the content present in the training, there is a forum where the instructor will promptly reply to your queries.

So, put your coding hats on and get into programming. All the best :)
