

## LAMP Installation:

1. Install the Metapackage apache2 by running the following command:

```
sudo apt-get install apache2
```

2. Install the Metapackage mysql-server by running the following command:

```
sudo apt-get install mysql-server
```

3. Install the Metapackages php5 and libapache2-mod-php5 by running the following commands:

```
sudo apt-get install php5 libapache2-mod-php5
```

4. The server should restart Apache automatically after the installation of both MySQL and PHP. If it doesn't, execute this command:

```
sudo /etc/init.d/apache2 restart
```

5. Open a web browser and navigate to <http://localhost/>. You should see a message saying *It works!* 6. Execute the following command, which will make PHP run the code:

```
php -r 'echo "\n\nYour PHP installation is working fine.\n\n\n";'
```
